# COMPANY PROFILE

( KITCHEN & HOOD EQUIPMENTS )

# ABOUT US

Chimney world its part from inox company established in 1994 in Doha Qatar, it was a small establishment until it began to expand with time to achieve a great success. Chimney world is specialized in designing, manufacturing, and installing home & industrial steel kitchen equipment that are rust resistance. It also provides exhausts with its full accessories, the perfect solution to smoke suction for restaurants and hotels. We have developed our company by modernizing all our equipments in order to become one of the specialized companies in this industry.

We provide our customers the quality products that would enhance the profit margins by our effective and efficient solution for their business, providing them the perfect planning, designing, installation, post sales service, maintenance and all the needed trainings. We also supply ready kitchen equipment manufactured in Italy and Turkey all of which is made from the best metal materials.

## Mission

Our mission is to provide high quality products and services to our customers, not only by using the best raw materials in manufacturing but also in finding new ways that improve the quality and save our customers money. Therefore we assure that any customized equipment is without any doubt performed under excellent techniques and high quality control standards to assure a quick process in the Design 2D , 3D , MEP Drawings and manufacturing process. To achieve this goal we are using the latest machines such as CNC laser cut machines, bending machines, and automated cut to link line to achieve excellent services & fast delivery for any equipment maintaining affordable budget prices.

## 6 Benefits of

# Repair with Maintenance

Corrective maintenance occurs when a maintenance technician discovers a problem while completing a preventive maintenance inspection, general, or emergency work order.

Corrective maintenance identifies, isolates, and rectifies a fault so that the equipment, machine, or system can be restored to its original condition.

Reduced emergency maintenance orders

Increased employee safety

Resolved problems before delays in production or service interruptions.

Extended lifetime of assets

Reduced employee injury

Optimized resource planning
